

ENTERPRISE ANALYTICS MADE SIMPLE WITH THE NEIGHBORLY SOFTWARE POWER BI MANAGED INSTANCE

ELEVATE YOUR DATA INSIGHTS WITH A MANAGED POWER BI PLATFORM

For Enterprise-level government programs, deep data insights are critical for managing complex initiatives effectively. Neighborly Software's Power BI Managed Instance offering provides a premium, fully managed analytics platform for organizations that need powerful dashboarding capabilities without the operational burden of managing infrastructure.

THE CHALLENGE ANALYTICS MANAGEMENT FOR DATA TEAMS

Many government organizations have dedicated data teams capable of building and analyzing dashboards but face challenges in efficiently distributing these dashboards to end users. Embedding dashboards within a unified platform is crucial to providing end users with consistent, accessible insights without the burden of managing infrastructure, access and training.

OUR SOLUTION A MANAGED EMBEDDED POWER BI INSTANCE, JUST FOR YOU

Neighborly Software's Managed Embedded Power BI instance is a Platform as a Service (PaaS) solution specifically geared for Enterprise customers. We manage the Power BI environment, allowing your data teams to focus solely on developing dashboards and gaining insights. By embedding dashboards directly in our platform, Neighborly Software eliminates friction, providing a seamless user experience. Additionally, our solution allows teams to update dashboards as often as needed and bring in external data, offering greater flexibility and responsiveness.

KEY FEATURES:

BUNDLED WITH THE DATA WAREHOUSE

This offering integrates seamlessly with Neighborly Software's Data Warehouse, providing comprehensive access to both raw data and advanced analytics tools in a unified experience.

CUSTOMIZABLE DASHBOARDS

Bring your own dashboards or develop new ones in your dedicated Power BI Environment. Update dashboards as frequently as you need, and bring in external data to enhance insights.

ENTERPRISE-GRADE POWER

Built for organizations with existing data teams, this solution provides an environment where dashboards can be developed, published, and seamlessly shared.

FULLY MANAGED INSTANCE

We handle the instance management, security, and core configuration, removing the operational burden from you team.

SEAMLESS INTEGRATION

Each Neighbor has their own Power BI Environment, integrated directly into Neighborly Software. Dashboards marked for display are visible within the Neighborly application, providing your users with consistent and integrated analytics.

EXTERNAL DATA INTEGRATION

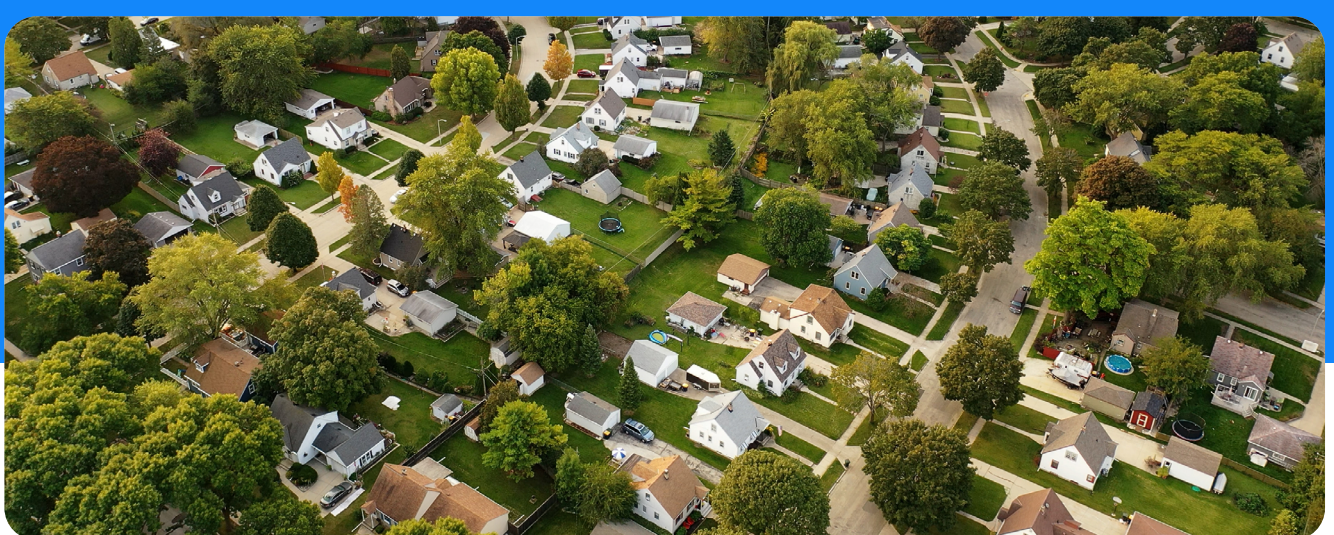

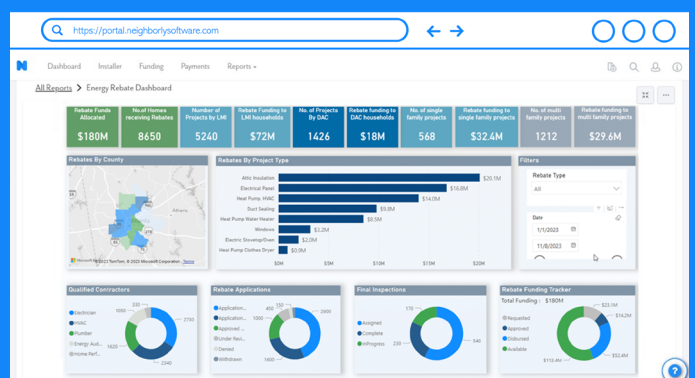

Bring in data from external Excel and CSV files to your Power BI environment, enhancing the scope and richness of your dashboard.

THE BENEFITS SIMPLIFIED ENTERPRISE ANALYTICS

✓ FOCUS ON INSIGHTS, NOT INFRASTRUCTURE
Let us take care of instance and core management so your team can focus on what they do best – creating and analyzing impactful dashboards.

✓ ENHANCED USER EXPERIENCE
Users can access near real-time analytics directly within the Neighborly Software platform, improving visibility and driving engagement.

✓ SCALABLE SOLUTION
As your needs evolve, your Power BI instance scales with you, ensuring it grows alongside your data requirements.

EMPOWER YOUR TEAM TODAY

Neighborly Software's Power BI Managed Instance provides a powerful, scalable, and fully managed solution for your data needs. Empower your analytics team with the right tools and let us handle the infrastructure, so you can focus on driving impactful decisions.

Discover how Neighborly Software can transform your analytics experience and elevate your program management.
